Architect: Himes-Peters

Lender: Self-funded

Riggins Construction & Management, Inc. acted as Construction Manager / Contractor for building two concrete tilt-up structures (approximately 22,000 SF each). The project consisted of all design and agency coordination through construction. The facilities featured metal-roofed entries, graylite glass, richly appointed office and restroom areas. Mezzanines were constructed in the warehouses over the offices. The complete structures included interior truck wells and fire protection systems.
