To: Tom Riggins

I would like to take this opportunity to thank Riggins Construction & Management Inc. for the excellent handling of the 3,625 foot expansion of our original 23,500 foot Tustin building, and tenant improvements for our tenant Fluid Research

Your response and coordination were outstanding, from the original "crash" schedule initially required to get them relocated, through the construction of the two steel-framed mezzanines along with the related manufacturing and laboratory facilities below.

Deserving of special mention is your close co-ordination with our architect, resulting in a rapid convergence on a final design, and persistence in obtaining the necessary permits from the city of Tustin in a timely manner. Your experience in dealing with the Tustin building department was extremely valuable in expediting initiation of our project.

We all appreciated how the construction schedule was coordinated to coincide with the manufacturing schedules and dust protection requirements of Fluid Research. We are happy to recommend your firm to anyone requiring close project coordination as well as desiring outstanding results, all while being completed on schedule and within budget.

Thanks again,
