Architect: Riggins Construction
& Management Inc.

Lender: Self-funded

For the second time SECURITY EXPRESS has turned to Riggins Construction & Management Inc. in completing a Corporate Headquarters for their progressive air freight organization. "Riggins" was commissioned via a design-build contract to fully renovate an existing 30,000 S.F. facility previously constructed by Riggins Construction & Management Inc. All existing offices were removed and 8000 S.F. of spacious new offices constructed. As a requirement, to maintain visual contact, all executive offices featured black anodized frames with clear glass walls over looking a common meeting area. Two additional restrooms were added as well as free standing dispatch offices in the center of the warehouse. Extensive amounts of built-in furniture, appliances and cabinets were installed to optimize space. Complete painting of the exterior of the building and installation of new landscaping was the last key feature of this elegant, yet very practical building.
